

General Safety Instructions

Keep all this information for safe and proper use. Also keep the packaging and packaging, as it contains operating instructions and information about the product, batteries and recharging. For more information, scan the QR code on the packaging.

General Safety Instructions

- Keep out of the reach of children as small parts can be swallowed.

- Only use the product if you are in good physical condition.
- Do not use the product with other people against their will. Only use with the consent of the people involved.
- Use the product safely to avoid injury. Use it your own risk.
- A doctor should be consulted before using the product if a person has any health issues or allergies.
- Do not use the product if disoriented or irritated skin.

- Consult a doctor immediately if unpleasant skin irritation or physical discomfort occurs. Consult a doctor if the symptoms persist.

- To avoid illness and infection, do not pass the product to the third parties.

- Read the information on the product packaging carefully to avoid allergic reactions (e.g. latex).
- Do not use the product if it is obviously non-functional, overloads or has visible defects.
- Do not freeze or heat the product, proceed slowly and carefully.
- The product is not suitable for commercial use.
- Do not inflate inflatable products beyond the diameter indicated on the packaging.
- The product is not suitable for medical use.
- Only charge the product with a suitable charger at a power socket. Observe the instructions of the respective mains adapter.

- No liability can be accepted for damage or accidents caused by improper use, the use of force, modifications and non-compliance with these safety instructions.

Before First Use

- Clean the product with warm water and mild soap before using it for the first time. To prevent damage to the device, make sure that no water gets into the battery compartment. Do not submerge the device in water.
- Check the product or insert the batteries (if supplied). For safety reasons, lithium batteries are generally only charged to 40-50% for transport.

- Switch the product on. Then insert it into the anus.

Use of Anal Toys

- Use any injury or tearing of the sphincter muscle during insertion, gently pre-stretch your sphincter muscle before anal intercourse. Only use toys with a smaller diameter at first and increase the size carefully.

- Apply sufficient lubricant to the surface of the product.
- Important: The use of water-based lubricant is recommended.**
- Important: To avoid pain during insertion, injury or tearing of the sphincter, use plenty of lubricant.**

- To start the vibration, use the control unit to switch the product on.

- Use a comfortable position for inserting the product, bend forwards on all fours or lie on your back with a cushion under your buttocks or equal over the product.

- A slowly insert the product into your anus.

Important: There are two muscle rings in the anus that the product must pass through during insertion. To avoid injury, insert the product slowly and carefully. If necessary, relax your anus beforehand by making circular movements with your finger.

Important: The retrieval handle or stopper prevents the product from sliding completely into the anus. The vibrations do not stop when the product is fully inserted.

- To change the vibration strength, carefully press, turn, or slide the control unit.

- Slowly remove the product from your anus by using the retrieval handle.

- To switch off the vibration after use, press, turn, or slide the control unit into the initial position.

Important! If the product switches off automatically when the battery is low, do not switch it on again, but charge it at a power socket.

Optional (when relevant):

- Some anal toys are also suitable for vaginal use. Clean the product thoroughly after each anal and use before coming into contact with vaginal use.
- Some anal toys have a special function (e.g. rotation, thrust function, pump function). Press the control unit to switch these functions on and off.
- Some anal toys have a pump ball. To increase the diameter of the anal, press the pump ball repeatedly if necessary. The anal toy is inflated. To let the air escape, open the valve.
- Some anal toys have a suction cup that allows you to attach the product to a smooth, clean and dry surface. Detach the suction cup carefully from the surface.

Care Instructions

- Allow the product to cool down after every use before putting it away.
- Clean the product after every use with warm water and a mild soap and disinfect it with a disinfectant solution suitable for the product. To prevent damage to the product, please make sure that no water enters the battery compartment. Do not submerge the device under water.
- Keep the product in a clean, cool and dry place. Moisture can damage the batteries and motor. Avoid direct sunlight.
- To prevent chemical reactions, store the product separately and not together with other products made from different materials.
- Store the batteries and rechargeable batteries and to prevent damage to the product, remove the batteries from the product after each use or remove the product from the socket as soon as the rechargeable battery is fully charged.

Disposal Information / Your Contribution to Environmental Protection

Do not discard the packaging material or old devices. Recycle items where possible. Separate packaging according to material and dispose of it with household waste. Do your best to separate and take old devices to your local collection points in accordance with your regional legislation and the applicable guidelines. Separate non-enclosed batteries and rechargeable batteries from other devices before you hand them in at a collection point. Make sure that you delete all personal data from your old devices before disposing of them.

- The symbol of the crossed-out garbage can on wheeled means that this product must be handed in free of charge to a collection point for household waste so that it can be recycled for the best possible reuse of materials.

- Batteries do not belong in household waste. As a consumer, you are under a legal obligation to turn in used batteries. You can do this at public collection points or places where batteries are sold. You can also return rechargeable batteries and batteries that we carry or have carried as new batteries to our dispatch warehouse Schillerweg 14, 24841 Fensburg, Germany (see the instructions for use after use). Batteries containing hazardous substances are labelled with the sign and one of the chemical symbols:
 - Cd: Battery contains cadmium
 - Cd: Battery contains mercury
 - Pb: Battery contains lead

- Batteries and battery packs for all systems can only be turned in at collection points if they have been discharged. To prevent short-circuits in the event of incomplete discharging, the poles on these types of batteries should be insulated using a substance such as adhesive tape before the batteries are returned.
